Dear Sir,

GOODENOUGH GOLD PROJECT MENZIES, WESTERN AUSTRALIA
Completion of Phase 4 & 5 RC Drilling Programme

Highlights:

- A total of **120** RC holes have been drilled on the Goodenough project.
- Multiple zones of gold mineralisation now exceed 450 metres along strike and 250 metres down dip.
- Gold mineralisation still remains open to the west and south.
- Global resource calculation is currently in progress. This will be followed by pit optimisation studies.
- A new exploration programme is being designed to test the structural corridor to the south west of the Goodenough mineralisation. This area contains numerous old workings that have not been tested using modern exploration drilling techniques.

Best drill intersections from latest drilling:

(For all one metre results >0.5g/t achieved to date please refer to Table 1)

Goodenough Phases 4&5 Drilling Results

The directors of YGL are pleased to announce that the phase 4&5 drilling programmes have successfully extended the strike length of the Goodenough mineralised zone from 300 metres previously reported to over 450 metres. Importantly the mineralisation still remains open both to the south and to the west. Further drilling is planned to test these extensions.

The recent drilling has defined a western high grade mineralised zone from surface to a depth of 80 metres. The mineralisation is dipping at 35 degrees to the south and covers a distance of 200 metres and remains open down dip (see attached cross section).

Details of all drilling to date are included in Table 1 attached.

Calculation of a global resource is currently in progress and is expected early March 2004.

For further information on the Company and a detailed listing of the Company's projects please visit our web site at www.yilgarngold.com or phone Lex Brailey on 08 9227-0197.

Yours faithfully,
for **YILGARN GOLD LIMITED**

Lex Brailey
Managing Director

NOTE: This report is based on information compiled by Mr N Taylor MAusIMM MAIG, an employee of the company, who is a competent person as defined in the Australasian Code for Reporting of Identified Mineral Resources and Ore Reserves, September 1992. This report accurately reflects the information compiled by the relevant competent person and is released with his written permission.
